4 June 1958

The Ramo-Wooldridge Corporation  
Los Angeles 45, California

Gentlemen:

1. Reference is made to Proposal CMCC Doc. No. 151X5.1105 dated May 15, 1958, for customer conducted field test for the revised System 2 equipment.

2. Reference proposal has been reviewed by Customer No. 2 and approved.

3. Due to the fact that testing was originally contemplated under the System II requirements, funding for this requirement should come from the \$35,400 balance remaining for Customer No. 2 (Contract Section B.4.) at completion of R&D work on System II as set forth in CMCC Doc. No. 151X5.1082, page 3, dated May 2, 1958.

Very truly yours,

25X1

  
Contracting Officer

May 15, 1958

Dear Dan:

This is a proposal for a customer conducted field test for the revised System 2 equipment, and supersedes the proposal which was contained in our CMCC Doc.No. 1132x5.184 dated December 20, 1957. The field test program set forth in our December proposal contemplated a test of eight to nine weeks and would have called for two men in Washington and two men at Seal Beach. In response to your request for a more modest field test program, we have reduced the total time to seven weeks and plan to provide only one man in Washington. Two men will continue to be required at the Seal Beach facility, mainly for safety purposes.

As mentioned in our letter CMCC Doc.No. 151x5.1082 dated May 2, 1958, the installation of the field station and base station prototype equipment and their preliminary check-out in preparation for the field test would commence about June 30, 1958. The field tests should then commence about July 14, 1958, and continue for a period of about five weeks.

25X1 The total estimated cost of this program would be [ ] The fee, 25X1 at [ ] and the total estimated cost including fee is [ ]. 25X1 As you know, provisions for field testing are not contained in the present contract; therefore, it appears to us that approval of this field test program would involve a contract amendment.

Sincerely,

Dean

DPS-1429

ENG-8-647

TO : Special Assistant to the Director for  
Planning and Development, DPS/DCI  
ATTN: Contracting Officer  
FROM : Chief, Engineering Division, OC

DATE: 10 JUN 1958

SUBJECT: Automatic Digital Transmission System, AS-8 (System 2)

1. The Ramo-Wooldridge Corporation is adapting System 2 airborne equipment to a field station communications system for the Office of Communications. Under the terms of the proposal for this work the contractor agreed to:

- a. Design, develop, fabricate and deliver two operational prototype System 2 (AS-8) field station equipments.
- b. Design and laboratory test one System 2 (AS-8) dual communications base station receiving equipment.

2. The proposal and the cost estimate (Attachment A & B, CMCC Doc. No. 151x5.1105) for field testing the AS-8 has been received from the contractor. The cover letter (Attachment A) states that provisions for field testing were not contained in the present contract, and therefore, the Ramo-Wooldridge Corporation feels that approval of the field test program would involve a contract amendment. It was the original intent of this program to employ the engineering services of the contractor in support of the field tests but this was inadvertently left out of the contract funding.

3. Although testing is not actually funded for in the original contract, it is requested that the [ ] required for this field testing be allotted from the balance of the FY 1957 funding for this contract.
